ANTHEM ELECTRONICS HONORED WITH CEA MARK OF EXCELLENCE AWARD

The Statement D2v takes home Gold for Audio Product of the Year

Toronto, Ontario – March 31, 2010 – The Consumer Electronics Association (CEA®) announced today that Anthem Electronics has won a 2010 Mark of Excellence Award, presented by CEA's TechHome Division. CEA's Mark of Excellence Awards honored the Anthem Statement D2v for outstanding achievement and innovation in trend setting custom home electronics products. Award entries were reviewed by a panel of industry experts and submitted in two categories: Supplier and Systems Integrators.

Taking home the Gold award for Audio Product of the Year, the Anthem Statement D2v is a multi-channel preamplifier, audio/video processor and tuner offering unmatched connectivity options and support for all of the latest HD formats. When used with Anthem Room Correction software, the Statement D2v will maximize the performance of any A/V system. The D2v also serves as a multiroom/whole-house entertainment control center with four independent signal paths (main, Zone 2, Zone 3, Record), an AM/FM tuner and a headphone amplifier. Anthem's acclaimed room correction system (ARC) is also standard with all D2v processors.

Engineered and manufactured in North America, the D2v remains the ultimate high-end statement – the final word in digital audio and digital video processing, not to mention, through ARC, its ability to solve the acoustic problems of the room.

“Since its debut, the Statement D2v has been a star in Anthem's product line-up,” says Mark Aling, Marketing Manager for Anthem, “To be recognized as an Audio Product of the Year by the CEA is a testament to the excellence in engineering, design and performance the D2v brings to the market.”

Anthem's Statement D2v was recognized at the Mark of Excellence Awards Reception this evening during the eleventh annual Electronic House Expo(EHX) Spring 2010.

Each year manufacturers, distributors and systems integrators enter to compete in award categories for this coveted honor. Each of the TechHome Mark of Excellence Awards categories has a four-member judging team comprised of systems integrators, manufacturers, members of the trade press and industry consultants to determine both finalists and winners.
