

ANHEIM® REVIEWS

Anthem Room Correction (ARC®) puts the sophistication and power of an advanced audio lab in your hands so that you can achieve perfect sound at home. Our PhDs did the hard work, so you don't need an engineering degree to use it. ARC is sophisticated enough to produce real results that you can hear, easy enough to be used by anyone, advanced enough to allow you to customize the settings, and professional enough to give you the kind of results you'd expect from software and hardware costing thousands of dollars.

the absolute sound

November 2019

<http://bit.ly/2X8q1QR>

"With ARC activated, the richly arranged backup vocals were more intelligible, and the scorching alto sax solos were less stressed-sounding at life-like volume levels. Predictably, it was the low frequencies that benefited most from DSP correction. Without equalization, the bass had something of the wooly character experienced with the jukebox at the corner bar. With ARC on, electric bass and kick drum gained considerably in clarity and slam." - Andy Quint
